A Note from the Chef: This year, instead of looking at the New Year as a time that we celebrate with overindulgence, I am choosing to embrace it as a healthy new beginning. There are certain foods that many believe, if eaten on the New Year, will help bring Health and Prosperity. Some of these foods are grapes (we've got that covered), beans, fish, noodles, pomegranate, pork, cabbage, and cakes. So, let's all dine and celebrate not only the year that was but also the year that is ahead.

"What a wonderful thought it is that some of the best days of our lives haven't even happened yet." - Anne Frank
